

Accessibility Addendum

A WCAG 2.2 AA contrast audit of the Draep Brand Book, v1.0 — every failing pairing, and a verified fix for each, shown before and after.

14 color pairings tested · 5 fail AA · every replacement verified against its WCAG 2.2 AA threshold, computed to relative luminance.

STANDARD**WCAG 2.2 AA****SCOPE****§04–06 · palette & components****FIXES****Solid white-on-orange CTA · 3 swaps**

The audit at a glance

Every color pairing the Brand Book defines (§04 Color Palette, §06 Component Library) was computed against WCAG 2.2 relative luminance. Note that the spec’s 15 px SemiBold button label counts as **normal** text — it gets no large-text leniency.

- AA · 4.5 : 1 · normal text
- AA · 3 : 1 · large text & non-text UI
- AAA · 7 : 1 · enhanced

PAIRING (AS USED IN THE BRAND BOOK)	FOREGROUND	BACKGROUND	RATIO	AA 4.5:1	AAA
PASS — KEEP AS-IS					
Wordmark, text & structure	#083068	#FFFFFF	12.86	PASS	AAA
Text on page backgrounds	#083068	#FFF6EA	12.02	PASS	AAA
Text on secondary sections	#083068	#EAF0F8	11.22	PASS	AAA
Error messages & QC-failed badge	#DC2626	#FFFFFF	4.83	PASS	
Info messages	#2563EB	#FFFFFF	5.17	PASS	
FAIL — FIXED IN THIS ADDENDUM					
Primary CTA label on tape gradient	#FFFFFF	4 stops	2.34–5.50	FAIL	
Orange text on white (prices, links)	#F89010	#FFFFFF	2.34	FAIL	
Orange ticks & dividers on Warm Sand	#F89010	#FFF6EA	2.18	FAIL	
Success text & Delivered badge	#16A34A	#FFFFFF	3.30	FAIL	
Warning text	#EAB308	#FFFFFF	1.92	FAIL	

Already strong: Ink Navy on all three light neutrals clears AAA at 11.2–12.9 : 1, and Error / Info already pass AA — the foundation is solid. The failures all involve **orange carrying text** and **two underpowered semantic colors**; the four pages that follow fix each one without leaving the brand’s hue families.

The tape-gradient button

CURRENT White label on the tape gradient

FAIL · 2.34–3.92

Book a free visit

135° gradient, pill, white 15 px SemiBold label, exactly as specified in §06.

#F89010
2.34

#E87810
2.95

#D06010
3.92

#A85010
5.50

Three of the four stops fail AA for normal text; only the darkest end passes. A 15 px SemiBold label is **normal** text, so it must hold **4.5 : 1 everywhere on the button**, not just at the dark end.

THE PICK · SOLID CTA Deep Tape #A85010 · white label, gradient retired

PASS · 5.50

Book a free visit

The tape's own dark end, promoted to the whole button. White 15 px SemiBold label — exactly as the book specs it.

#A85010 + white
5.50

#A85010 vs sand
5.14

No new color, no label resize, comfortable margin. Hover and pressed darken to #9A4A0E at 6.25 : 1; an Ember focus ring clears 3 : 1 at 3.92.

BRIGHTER · MORE POP Solid #B85A10 · the passing ceiling

PASS · 4.66

Book a free visit

The brightest orange that still carries white text — about one shade brighter than the pick.

#B85A10 + white
4.66

#B85A10 vs sand
4.35

Valid AA, but the margin is thin: #C05A10, one shade brighter, already fails at 4.46. A new hex for the palette, in exchange for one shade of pop.

ESCAPE HATCH · BRIGHTEST ORANGE Ember #D06010 · white at 19 px bold

PASS · 3.92 large

Book a free visit

Ember is already a primary color, and a 19 px bold label is normal for a hero CTA.

Large text (≥ 19 px at weight 700, or ≥ 24 px) needs only 3 : 1, which Ember clears at 3.92 — but at the book's 15 px SemiBold this same button fails ($3.92 < 4.5$), so this recipe locks the label at 19 px +.

Orange text & tape marks on light backgrounds

CURRENT Draep Orange carrying text and UI marks

FAIL · 2.18–2.34

CATALOGUE PRICE — ON CHALK WHITE

From ₹800 · #DRP-10428

TICK DIVIDER & TIMELINE MARKS — ON WARM SAND

Orange text on white: **2.34 : 1**; orange ticks on Warm Sand: **2.18 : 1** — below even the 3 : 1 non-text minimum. The Brand Book's own rule ("don't set *small* orange text on white") understates it: it fails at any size.

FIX · TEXT Display text stays orange — Ember #D06010

PASS · 3.66–3.92

PRICES AT 24 PX — EMBER ON WHITE AND WARM SAND (LARGE-TEXT AA)

From ₹800 · #DRP-10428

From ₹2,400 · 3.66 : 1 on sand

Blouse stitching — from ₹800 · body-size prices in Ink Navy, 12.86 : 1

Large text (≥ 24 px, or ≥ 19 px at weight 700) needs only 3 : 1, and Ember clears it on white **3.92** and sand **3.66**, so display prices keep their warmth. Smaller orange text becomes Ink Navy — and when the accent is truly essential, #A85010 holds 5.50 : 1 at any size.

FIX · NON-TEXT Ember #D06010 for ticks, timelines & focus

PASS · 3.66–3.92

TAPE TIMELINE ON WARM SAND — TICKS, TRACK & DONE-STEPS IN EMBER

Ember already exists in the palette as the hover/pressed shade — it just was never used for UI marks. At **3.92 : 1** on white and **3.66 : 1** on sand it clears the 3 : 1 non-text bar for tick dividers, the timeline, dashed in-progress borders and focus rings.

New rule for \$04: #F89010 is a **surface and accent color** — fills, gradients, thread. Text goes Ember at display size and Ink Navy at body size; marks and dividers go Ember.

Success & warning states

CURRENT Success #16A34A as text & badge

FAIL · 3.30

DELIVERED BADGE & CONFIRMATION TOAST

✓ Delivered Trial passed — order closed, tailor paid.

3.30 : 1 passes only the large-text minimum; badges and toasts are 12–13 px normal text, so they need 4.5 : 1.

FIX Success #15803D — same green, darker

PASS · 5.02

TEXT ON WHITE 5.02 · ON WARM SAND 4.69 · SOLID BADGE 5.02

✓ Delivered ✓ Delivered Trial passed — order closed, tailor paid.

One shade darker in the same family fixes text, badges and toasts in a single swap. **AAA option:** #166534 at 7.13 : 1.

CURRENT Warning #EAB308 as text

FAIL · 1.92

AWAITING-SLOT MESSAGE ON WHITE

Order on hold — fabric delayed by two days.

At 1.92 : 1, yellow text on white is effectively invisible to low-vision users and useless in bright sunlight. Yellow can still be the warning *signal* — it just can't be the ink.

FIX Yellow as background · Deep Amber as text

PASS · 4.92–6.71

CHIP: #EAB308 FILL + INK NAVY TEXT — 6.71 : 1

• Awaiting slot Reschedule up to 2 hours before — standalone text in #A16207 · 4.92 : 1

Two compliant patterns: the yellow chip with navy text (6.71 : 1), or standalone warning text in #A16207 (4.92 : 1 on white, 4.60 on sand). **AAA option:** #854D0E at 6.85 : 1.

Unchanged: Error #DC2626 (4.83) and Info #2563EB (5.17) already pass AA — keep them exactly as specified.

The corrected palette at a glance

USE	WAS	NOW	CONTRAST	WHERE IT APPLIES
Primary CTA · solid, white label	#F89010 → #A85010 + white	solid #A85010 · hover #9A4A0E	5.50 · 6.25	All primary buttons; label stays 15 px SemiBold
Primary CTA · brighter options		#B85A10 any size · #D06010 at ≥19 px bold	4.66 · 3.92	If more pop outranks margin
Orange as text	#F89010	≥24 px: #D06010 · smaller: navy · opt #A85010	3.92 · 12.86 · 5.50	Display prices stay orange; body size inks navy
Orange as non-text UI	#F89010	#D06010 Ember	3.66–3.92	Tick dividers, Tape Timeline, in-progress borders, focus rings
Success	#16A34A	#15803D · AAA: #166534	5.02 · 7.13	Delivered badge, trial-passed toasts
Warning	#EAB308 text	#EAB308 fill + navy text · text: #A16207	6.71 · 4.92	Awaiting-slot chips, alert messages

Write these six rules into the Brand Book

1. **The primary CTA is solid #A85010 with its white 15 px SemiBold label** (5.50 : 1; hover #9A4A0E at 6.25). White on any brighter orange fails — #B85A10 (4.66) is the ceiling, Ember only at ≥19 px bold.
2. **Orange text only at display size** — ≥24 px, or ≥19 px at weight 700, in Ember #D06010. Body-size accents: Ink Navy, or #A85010 at 5.50 : 1.
3. **Ember #D06010 is the non-text orange** — tick dividers, the Tape Timeline, dashed in-progress borders and focus rings (3.6–3.9 : 1).
4. **Success is #15803D**. Warning yellow appears only as a background under Ink Navy text; standalone warning text is #A16207.
5. **A 15 px SemiBold label is normal text** — every button, chip and badge holds 4.5 : 1, not the 3 : 1 large-text bar.
6. **Define Tape Silver in §04**. §06 uses it for in-progress borders but the palette never assigns it a hex — an unspecified color cannot be audited.

The brand survives intact: every fix stays inside the existing hue families — most are shades the palette already contains, promoted to named roles. Nothing changes but lightness; everything changes for the 1 in 4 users who need it.
